SKILLS

Languages

- JavaScript
- TypeScript
- Python
- HTML/CSS

Frontend

- React
- Next.js
- Responsive UI

Backend

- Node.js
- NestJS
- REST APIs
- PostgreSQL
- Redis
- Socket.IO

AI & Automation

- AI-assisted dev (Claude)
- Prompt engineering
- Multiple LLMs
- n8n
- Web scraping
- Telegram Bot API

Web & DevOps

- WordPress
- cPanel/WHM
- DNS & domains
- SEO
- NocoDB
- Git

EDUCATION

- Fullstack Developer
- GoIT
- 2023 – 2024
- Bachelor of Philosophy
- Kyiv-Mohyla Academy
- 2021 – 2025

LANGUAGES

- Ukrainian Native
- English Professional

Fullstack developer who ships real, production products with AI as a core tool. Co-founder of a launched scheduling SaaS available as **native iOS & Android apps and a full web platform**; at Best Driver Kyiv I build AI-driven automations, online examination platforms and full web infrastructure end to end — from idea and workflow design through to deployment and support.

EXPERIENCE

Co-Founder & Developer · Narval

Remote · scheduling & client-management SaaS

Apr 2026 – Present

- Co-founded a **mobile-first scheduling & client-management platform** for service businesses (nail, barber, brow & lash, massage and tattoo studios); originated the product concept and end-to-end workflow design.
- Built as a **two-person team, AI-assisted with Claude**: the product spans native **iOS (SwiftUI)**, **Android (Kotlin)** and **web (Next.js)**, with a NestJS/TypeScript, PostgreSQL and Redis backend, Paddle billing, APNs/FCM push and GDPR-compliant data handling.
- Drove the product from **idea to public launch** (July 2026) — directing the AI build and owning the concept, UX and workflows end to end.

AI Prompt Engineer · Best Driver Kyiv

Remote · driver-certification training (Code 95, ADR, TACHO)

Aug 2025 – Present

- Built **AI-driven competitor price-monitoring** automations with **n8n**, web scraping and **LLMs** (to parse scraped data resiliently), plus **Telegram Bot API** integrations to reach phone-gated pricing; delivered structured competitor datasets.
- Developed and deployed **online driver-examination platforms** (Code 95 / ADR and boat-operator) on a **React + Python** stack, serving multiple business entities — live at **adrtest.com.ua** and **kateritest.com.ua**.
- Ran **B2B lead-generation & email outreach**: sourced transport/logistics firms via YouControl & Opendatabot (KVED filtering), executed ProtonMail campaigns and handled inbound replies.
- Managed **web infrastructure end to end**: server migrations via cPanel/WHM, domain & DNS management (Hostiq), WordPress builds, SEO, and email/hosting troubleshooting.
- Curated training-content datasets in **NocoDB**; selected as **task lead** on a multi-site delivery (May 2026).

SELECTED PROJECTS

The Best Driver Kyiv platforms are private company products — full screenshots & write-ups on [vadym-star.github.io](#)
